

CAPABILITY STATEMENT

Overview

Omutwar Technical Partners is an Austin-based technology consultancy specializing in Quality Engineering and SDET Architecture. We build the automated guardrails for mission-critical GovTech and FinTech platforms, ensuring zero-defect delivery and high-velocity release cycles.

PAST PERFORMANCE

- **State Medicaid Modernization Initiative:** Architected the automated QA ecosystem, reducing legacy test execution from 3 days to 30 minutes.
- **Enterprise Tech (Apple):** Engineered high-concurrency quality frameworks for global, mission-critical systems.
- **Advanced Manufacturing (ASML):** Anchored architectural testing strategies for high-precision, zero-defect environments.

KEY DIFFERENTIATORS

- **Zero-Defect Commitment:** Guardrail-driven architecture that prevents critical production rollbacks and stabilizes bleeding systems.
- **High-Velocity Delivery:** Reducing enterprise deployment cycles from weeks to minutes through automation-first engineering principles.
- **Agile Risk Mitigation:** Proactive identification of performance bottlenecks and regulatory compliance gaps before code merges.

CORE COMPETENCIES

Distributed Quality

High-concurrency framework design using Playwright, Cypress, and Selenium.

Cloud & CI/CD

Secure AWS infrastructure, IaC (Terraform/Docker), and hardened GovTech pipelines.

Regulatory Compliance

Embedding shift-left security, accessibility, and federal data privacy natively into workflows.

Engineering Governance

Operational playbooks and runbooks to standardize delivery across large remote teams.

COMPANY DATA

- HQ: Austin, Texas
- Texas CMBL Vendor #: 555375
- Texas VID: 1415234424900
- Status: Texas HUB Eligible
- NAICS Codes: 541511, 541512
- Website: www.omutwar.com
- Contact: contact@omutwar.com
